## Community College’s Local Strategic Value

Institution: Lake Michigan College

Section 230 of PA 103 of 2023, the Fiscal Year 2024 community colleges appropriations bill contains the qualifications that must be met to receive the portion of each college’s performance funding appropriation earmarked for local strategic value. The statute lists 15 separate best practices for community colleges to achieve. Institutions must satisfy 4 of 5 best practices in each of 3 different categories.

To demonstrate eligibility for this funding, Section 230 requires that each community college certifies compliance to the State Budget Office by means of a board of trustees resolution certifying that the college has met 4 of 5 best practices in each category. Further, each board resolution “shall provide specifics as to how the community college meets each best practice measure within each category.” **This resolution must be properly passed by the board and submitted to this office on or before October 15, 2023.** However, if a resolution from a prior year is still in effect and factually correct, you may resubmit this resolution. Please send a copy with an indication of the date of its passage.

Please use this table as a method to **briefly** detail what your community college is doing to meet the best practices in each category. Each category is worth one-third of the total amount available for your institution. Your institution must meet 4 out of 5 best practices in a category to receive funding associated with that category.

Best Practices by Category	Examples of Adherence
<b>Category A: Economic Development and Business or Industry Partnerships (must meet 4 of 5)</b>	
(i) The community college has active partnerships with local employers including hospitals and health care providers.	<p>The College's active partnerships with hospitals and health care organizations are inclusive of health care program apprenticeships and strategies to increase the diversity within the health care field.</p> <p>All Career &amp; Workforce Education (CWE) and Health Sciences programs at the College have an advisory committee that includes representation from business and industry. Every CWE and Health Sciences program is required to have two advisory committee meetings per year. Through advisory committees for CWE courses, the College interacts and solicits advice from regional employers on course offerings and program development.</p> <p>Many students in our health care programs are hired either during their education or after graduation because of their clinical experience or internship. Once a year LMC offers a Kettering Seminar that further educates up to five of our Radiologic Technology alum (that have graduated and registered) from our clinical facilities.</p>
